The Multi-Paint-System

Paint suppliers are faced with the increasing demand of industry and trade to supply products according to individual quality needs concerning colours, gloss degrees, surface structures. Furthermore customers require "just-in-time" deliveries of a variety of quantities ranging from very small to large volumes. The solution to meet these demands is **Pro Mix® Industry**, the Multi-Paint-System.

With **only a few system components**, that bring stock levels down to a minimum, all common industrial primer and top coat qualities, single or two component, with most different gloss levels and structures for all common kinds of application like brushing, rolling or spraying are made available. With pigment pastes, which are universal in use, the different base qualities are tinted exactly to the required colour shade. The colours can be produced with lead-free pigments tailor-made to customers' choice.

... for Industry and Craft

Pro Mix® Industry:

Quality + Price

As the tinting takes place by adding the pigment pastes in ready pre-filled cans the packing costs are reduced to a minimum. Exact dosing of the pigment pastes is done manually or by a automatic dispenser. Every formulation is **optimized in quality, covering power and price.**

Especially using the automatic dispenser connected to the Pro Mix® Industry formulation software including cost calculation results in short production times and rigid exactness in colour. Next to the prefilled standard cans certainly also other tin sizes can be produced.

perfect Paint-Managment

The Multi-Paint-System.

- Customized products
- Few system-components
- Pigment pastes for universal usage
- Perfectly adjusted
- Automatic tinting
- Thousands of colors
- Lead-free pigment pastes

The qualities and products of Pro Mix[®] Industry

The variety of qualities in Pro Mix[®] Industry is attractive to a very wide range of customers. Paint consumers in the segments mechanical engineering, metal, foundry, wood and plastic industry, vehicle builders, steel constructors as well as painters and body shops find all necessary products.
