

Mipa 2K-Multifiller

Fast drying all-rounder

Mipa 2K-Multifiller combines the characteristics of a sanding filler, wet-on-wet filler and filler for plastics. Many different fillers and additives can be replaced by this product which leads to simpler routines in paint shops.

- Recoatable with Mipa 1K and 2K lacquers.
- Universal adhesion: applicable directly on steel, iron, aluminium and zinc substrates as well as on commonly used plastics in the automotive industry (e.g. PP-EPDM, ABS, PC, ABS-PC, PMMA, PUR, PVC and GRP).
- Can be used for overcoating intact cathaphoretic coatings without pre-sanding.

Available colours: light gray and dark gray
