

Mipa P 182

Mipa P 182 is a pourable 2K polyester fine putty with reduced specific weight to close any small pores that may still be present or to level out small unevenness. This PE glazing putty creates an especially smooth, glossy surface.

- Smooth, glossy and closed surface
- Excellent sandability
- Adhesion to iron, steel, aluminium, galvanized substrates, GRP and wood
- Special air impermeable package.
No change of viscosity!
