

Mipa Carbon System

Mipa P 27 Crystal

PE-transparent putty for UV-resistant putty work on carbon surfaces or tintable for design use.

Mipa P 67 S

Transparent Polyester spray filler for colourless UV-resistant filling directly before a clearcoat is applied on carbon substrates.

Mipa 2K-HS-Carbonic-Klarlack

Special clearcoat with particularly high UV-protection and good filling properties designed to be applied directly to carbon surfaces.

Quality  made in Germany
