

Mipa 2K-HS-NiN-Füller F 37

Wet-on-wet filler for high efficiency

Mipa 2K-HS-NiN-Füller F 37 is a high-quality wet-on-wet filler that offers excellent possibilities for efficient paintwork. Intact, stable CDP-coatings can be recoated with the 2K-acrylic filler without prior sanding. Fast recoatability and universal adhesion, even on plastic surfaces, are further benefits of the new wet-on-wet filler.

- Excellent overspray absorption
- Recoatable after 15 min
- No shrinking
- No sanding and shorter drying times
