

**Intended use**

Mipa Anti-Silikon-Zusatz (anti silicone additive) avoids cratering and improves the flow when coating surfaces with residues of silicone, polish, wax and grease. Suitable for Mipa 2K paints (Mipa OC, PUR HS, all Mipa 2K clearcoats) and Mipa paints based on synthetic resins.

Quantity to add: 2 up to max. 5% Mipa Anti-Silicone additive to base paint or to base paint after addition of hardener in case of 2K paint materials.

The use of Mipa Anti-Silikon-Zusatz has no influence on drying times.

**Processing instructions**

**Mixing ratio**

**by weight (lacquer : anti silicone additive)**  
add at most 2 - max. 5 % to the basic paint

**Hardener**

see tech sheet basic product

**Pot life**
